Verification Approach

continuation

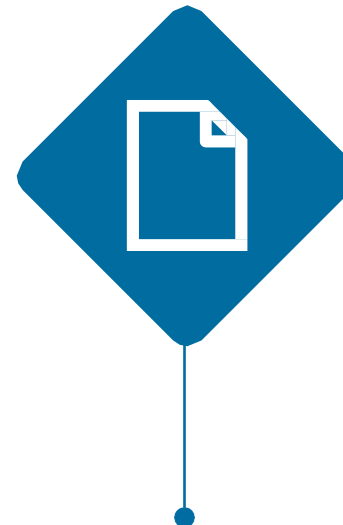

Review Process

- File prepared and handed over to Technical Signatory within 5 working days after onsite verification
- File review
- Addressing of review notes
- File finalization

Onsite Verification

- Onsite
- Verification Commencement
- Opening Meeting
- Interviews
- Any known differences discussed
- Preliminary score discussion
- Signing off on any outstanding documentation

Preliminary Report and Appeal Process

- Preliminary Report and Final invoice sent to client with detailed scoring
- Client has 5 business days to appeal/dispute or accept the score
- If score is appealed/disputed, this process is managed and resolution finalized by Independent Team to those who carried out the verification

B-BBEE Certification

- Once the final payment is made the B-BBEE Certificate is issued
- The client satisfaction survey is sent to client to rate service received from mPowerRatings
- Once the satisfaction survey has been received the verification file is archived

Verification Approach

continuation

A risk-based approach is adopted by mPowerRatings when carrying out verifications. In addition to the risk-based approach mPowerRatings also subscribes to the principle of substance over legal form when verification activities are carried out.

mPowerRatings uses SharePoint (Microsoft Software Product) to share and receive verification documents. Therefore, no physical documents are required by mPowerRatings in order to perform the verification. An electronic scorecard calculator is used to process and calculate the verification score.

Onsite verifications are carried out in person or virtually (depending on the client's needs). All virtual engagements are conducted using Microsoft Teams.

The time period allocated to start and complete standard verifications is between eight to twelve weeks in accordance with our internal methodology. In certain instances, clients may require a quicker turnaround time on verifications, in which case the fast-track option is made available to clients where verifications are concluded in a shorter time period than standard verifications.

This option comes at a 50% premium on the total invoice value of a standard verification.

mPowerRatings has one central office situated in Rosebank, however our ability to carry out verifications fully online enables us to offer our services nationally with relative ease.
